

Installation instructions for the Shoutcast Admin Panel 3 - Public Beta 1

PREAMBLE

Dear User, first of all thank you for your interest in this open-source application. This program offers you a simplified administration of Nullsoft's Shoutcast server. We have put a lot of time and a lot of work into this program, and are also very proud to offer this modern version.

I would like to thank Andreas Reis, Flemming Lorenzen, Marcel Weinberg that they helped me a lot to be able to put all this effort in this program, to make it possible to publish this program with a variety of functions.

I wish you all the best and much success with using this program.

Best regards, Sebastian Gräbner

DONATIONS

We would ask you to send us a small donation. Many users would like to donate, and just do not know how they can donate. We offer you:

- Paypal
- Call2Pay (0900)
- ATM (Debit)
- eBank2Pay
- HandyPay (SMS)

We would be happy about any donation, many programs are similar to this program are only to be useable by buying them at high costs. We are open-source, so please support the developers.

Thank you!

Donation Link: <http://www.shoutcastadmin.info/index.php?content=download>

At the bottom right you will see a donation box, with several small images for donation opportunities!

PREPARATION

Before you install the Shoutcast Admin Panel 3, we would like to ask you to check the following required settings, and to ensure that these settings are set correctly and are available on your server:

General Requirements:

- 256MB RAM
- 1Gigahertz Prozessor
- 20MB or more Webpace [please be aware that you will need more Space for the MP3 Files for the AutoDJ]
- 1 MBit or better, Internet Connection

Linux:

- GNU C library 32bit [GLIBC32]
- PHP 4 / 5 [PHP SAFE_MODE = "OFF"]
- SSH2 with existing 'extension' in php.ini
- 'Sudo' in Linux
- Webserver on Apache
- vServer or Dedicated / Root, [NORMAL WEBSpace IS NOT ENOUGH REQUIREMENT FOR]

Windows:

- PHP 4 / 5 [php safe_mode = "off"]
- Webserver on Apache
- vServer or Dedicated / Root, [NORMAL WEBSpace IS NOT ENOUGH REQUIREMENT FOR]

AutoDJ and MP3 Upload will be just work under Linux enviroment, Windows is not supported for AutoDJ Function.

INSTALLATION

Once you have all the files on your system, upload all files from the / upload folder onto your server. After all of these files have uploaded successfully, please set the following files with CHMOD 777:

- ./htaccess
- ./logs/
- ./temp/
- ./pages/upload/
- ./files/linux/sc_serv
- ./files/linux/sc_trans
- ./files/windows/sc_serv.exe

Once you have changed all the files and folders with CHMOD 777, we can start the installation.

Please change the following file with your database information:

./database.php

```
<?php
$db_host = "localhost";
$db_username = "username";
$db_password = "password";
$dbname = "dbname";
?>
```

After you have changed the file with the MySQL connection data save the file back to your server. Please call on your browser the file "beta_install.php" over your web address, e.g.:

http://www.IhreDomain.com/folder/shoutcast/beta_install.php

After you open the page, please enter all the data into the required fields, and leave none of these blank. Once you have done this, you may delete this file again. You may then log on with into your panel.

SHOUTCAST SERVER

To create a server, we would like to ask you to open this YouTube link in HD:

YouTube [HD] - <http://www.youtube.com/watch?v=yUzp67szcYk&hd=1>
